18x50mm SPYSCOPE

CAUTION! Viewing the sun can cause permanent eye damage. Do not view the sun with this scope or the naked eye.

HOW TO USE YOUR SPYSCOPE:

1. Remove the scope from the storage chest.
2. Hold the eyepiece tube(Fig. 1) and extend it out all the way out as show in Fig 2.
3. Point the objective lens to an object and look through the eyepiece.
4. With slow and tiny motions, rotate the eyepiece slowly to focus. Slightly push and pull the eyepiece tube in and out to focus until your view of the image is sharp.

FIG. 1

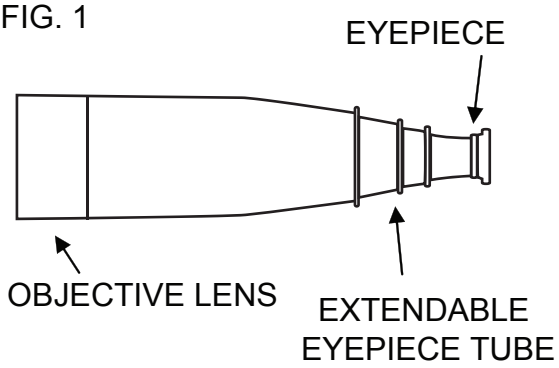

FIG. 2

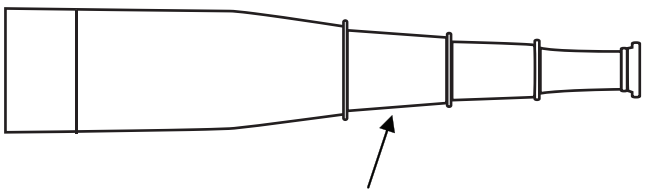

HOW TO TAKE CARE OF YOUR SPYSCOPE:

1. To clean you scope, wipe gently using a soft lens cloth .
2. To remove any remaining dirt or smudges, add one or two drops of isopropyl alcohol to the cloth, and wipe gently.
3. Store your spyscope in a moisture-free area and dust-free area. Keep the scope in the storage chest for better protection.

IMPORTANT: Never attempt to clean the scope internally or try to take it apart.
